A word from the Technical Committee Chairman

“

The 2025 Technical Conference at the World Utilities Congress is where innovation meets action. This year, we are not just discussing change, we are driving it.

From revolutionising grid infrastructure to unlocking the full potential of digitalisation and accelerating the race to net zero, we are shaping a cleaner, smarter, and more resilient energy future. The time to act is now. ”

Dr. Afif Al Yafei
CEO
TAQA Transmission
UAE

Technical Conference

Energy transition and digital transformation are the key drivers in the water and power sector, shaping the future of the industry, highlighting a clear direction for success, and opening doors to new industry players.

The Technical Conference offers utilities industry professionals unprecedented access to the latest industry knowledge and research findings, technical expertise, new project developments, state-of-the-art technologies, and industry best practices.

Spanning the entire power and water value chain, the World Utilities Congress 2025 Technical Conference has been created after a thorough two-stage review by the Technical Committee, comprising 57 industry specialists. The conference features 110 industry experts speaking at 27 sessions across three days and covers power generation, transmission and distribution, water management, water sewage, district cooling, and customer engagement.

Do not miss this unrivalled opportunity to meet face-to-face with your existing and new clients, learn the latest technology trends and developments, and identify new market opportunities within the power and water industry.

GAIN CPD ACCREDITATION

The World Utilities Congress Technical Conference is CPD-accredited, providing globally recognised professional development for energy professionals. The programme ensures your qualifications stay relevant while helping you gain new skills, industry insights, and CPD points to advance your career. By demonstrating a commitment to continuous learning, it positions you at the forefront of the evolving energy sector.

Reasons to Attend

The World Utilities Congress is an ideal platform for industry professionals to share insights, discover innovative technologies, and forge strategic partnerships.

Industry-leading Expertise:

Gain insights into best practices, emerging technologies, and the latest advancements in the power and water sectors.

Competitive Edge:

Understand market dynamics and evolving client needs to stay ahead in an increasingly complex utilities landscape.

Expert-led Learning:

Learn how industry leaders are addressing challenges, driving resilience, and unlocking new opportunities.

Strategic Networking:

Engage directly with key stakeholders across the power and water value chain to foster collaborations and accelerate progress toward sustainability goals.

Meet and network with leading technical experts presenting at the World Utilities Congress Technical Conference:

Technical Categories

CATEGORY 1

Power generation

CATEGORY 2

Energy storage and management

CATEGORY 3

Grid modernisation and smart grids

CATEGORY 4

Low carbon, alternative fuels, and renewable energy

CATEGORY 5

Hydrogen

CATEGORY 6

Nuclear energy

CATEGORY 7

Energy transition, decarbonisation and environmental sustainability

CATEGORY 8

Water supply and treatment

CATEGORY 9

Water infrastructure and sustainability

CATEGORY 10

District energy systems

CATEGORY 11

Gas: processing, operations and technology

CATEGORY 12

Energy markets, strategies and finance

CATEGORY 13

Project management in utilities

CATEGORY 14

Logistics and supply chain in utilities

CATEGORY 15

Critical minerals and rare earth

CATEGORY 16

Future mobility and smart communities

CATEGORY 17

Digital transformation and emerging technologies

CATEGORY 18

Operational excellence and asset maintenance

CATEGORY 19

Health, safety, and risk management

CATEGORY 20

ESG (Environmental, Social, and Governance) in utilities

Join the Premier Platform Driving the Transformation of the Utilities Sector

The World Utilities Congress, taking place in Abu Dhabi from **27-29 May 2025**, is a premier platform for global energy leaders, policymakers, and innovators to address key challenges in the power and water utilities sector. As the industry advances toward decarbonisation and sustainability, the event fosters high-level discussions, showcases cutting-edge solutions, and drives strategic collaborations.

The congress offers unmatched networking opportunities, connecting industry executives, policymakers, and solution providers to foster partnerships, explore investments, and shape the future of global utilities.

Event in Numbers

18,000+

Exhibition Attendees

20,000 M²+

Exhibition Space

500+

Conference Speakers

120+

Conference Sessions

1,400

Participating Countries

Conferences Overview

The conferences at World Utilities Congress foster the strategic insights and technical expertise needed for power and water utilities to deliver the low-carbon systems of tomorrow. Across 3 days, the conferences will convene Ministers, CEOs, academics, and industry influencers to address the critical challenges and discuss the possibilities and opportunities for a net zero utilities sector of the future.

Strategic Conference

Cross-sector collaboration is essential to drive forward the transformation of power and water utilities. This conference will convene global policymakers and industry leaders to discuss pivotal trends and actionable strategies shaping the future of utilities, with a focus on scalable impact and efficiency.

Technical Conference

To address the energy transition, we need the brightest minds and technical experts at the table. This conference will surface the voices of industry experts as they share knowledge and research insights and unveil the latest developments across energy, water, and utilities.

Leadership Roundtables

Gathering stakeholders – from Ministers and policy makers to CEOs and scientists – these roundtable discussions offer an exclusive setting for collaborative problem-solving on financing, governance, and sustainability, fostering a strategic dialogue that supports transformation and progress across the sector.

Innovation Theatres

A platform for visionary thinkers and technology pioneers to present transformative solutions for the utilities sector. Through live demonstrations and interactive sessions, participants will experience firsthand the latest advancements in smart infrastructure, digital integration, and sustainable practices.

The Exhibition

The exhibition connects industry leaders, innovators, and solution providers, presenting cutting-edge technologies that address evolving utility sector demands.

Exhibitors gain direct access to a qualified global audience, fostering valuable connections with key decision-makers. The event highlights solutions that enhance operational resilience, sustainability, and the seamless integration of new technologies into utilities.
